service body accessories

Swing Up 100mm Vice

XL's uniquely designed swing up vice is ideally located at the rear of the service body on the passenger's side. Quick to erect it provides the ideal working platform.

XL 6 Drawer Toolbox

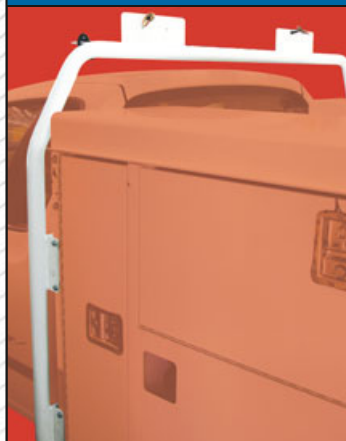

The XL 6 drawer toolbox is the perfect solution for carrying your tools. Designed to fit in the centre cabinets, they are made to maximise the area provided. The drawers are made from tough galvanised steel, with high impact rubber mat flooring to protect your tools.

Steel False Floor - Steel with Central Divider

Providing 210mm clearance, the false floor is an ideal option if you want to keep shovels and spades separate from other items in the central storage area. We recommend a central divider for mounting heavy items in the central storage areas such as water tanks, pumps or generators.

Light Bar - Heavy Duty - (lamp not included)

The XL light bar is ideal for mounting rotating lights, spotlights, aerials and brake lights. Available in tough pearl white powder coat.

Gas Bottle Holders

XL's gas bottle holders come in a variety of sizes to suit all bottle requirements.

Water Tank - Polyethylene - 29lt apron mount - (tap in tail light)

With the water tank mounted conveniently at the front of the central storage area, valuable space in the central storage area is maximised. The tanks' tap is mounted to the rear of the service body to allow for easy access.

Conduit Carrier - PVC

Available in custom lengths up to 4.6m. These tough, lightweight, UV stabilised conduit carriers are ideal for rods and other thin items. Available in 2 diameters, 100mm and 150mm, they are easily mounted to any XL roof rack.
